

Duke Energy:

- Duke Energy (NYSE: DUK), a Fortune 150 company headquartered in Charlotte, N.C., is one of America's largest energy holding companies.
- The company's electric utilities serve 8.6 million customers in North Carolina, South Carolina, Florida, Indiana, Ohio and Kentucky, and collectively own approximately 55,100 megawatts of energy capacity.
- Its natural gas utilities serve 1.7 million customers in North Carolina, South Carolina, Tennessee, Ohio and Kentucky.
- Duke Energy is executing an ambitious energy transition, keeping customer reliability and value at the forefront as it builds a smarter energy future. The company is investing in major electric grid upgrades and cleaner generation, including natural gas, nuclear, renewables and energy storage.
- With more than 110 generating facilities, Duke Energy's owned regulated assets consist of nuclear, natural gas, coal, hydro, solar and energy storage assets. The majority of these assets are found in the Southeast U.S. Duke Energy operates 11 nuclear units at six sites across the Carolinas, making nuclear energy the company's largest generation source in the region.

Supply Needs:

Power stations and battery storage facilities like the ones Duke Energy operates are typically in need of the following inputs:

- Boilers
- Turbines
- Gearbox and generator systems
- Photovoltaic panels & components
- Electrical grid components
- Fuel cells
- Lithium-ion & Lead-acid batteries
- Electrochemical and other electrical components (e.g. anodes, cathodes, etc.)
- Switchgear and breakers
- Protective relays
- Maintenance & repair services
- Engineering services
- Electrical equipment services
- Transformers
- Power semiconductors
- Capacitors and inductors
- Sensors
- Fire suppression systems
- Microcontrollers and communications hardware
- Coolants
- Generators
- Inverters and controllers
- Oils and lubricants
